everactive

Evergateway 2.0

The Bridge to Continuous Insight from Everactive's Batteryless Wireless IoT Devices

The improved Evergateway enables seamless, reliable, and secure data transfer from always-on batteryless Eversenors.

1 **Physical robustness to survive the toughest of environments:**
» Polycarbonate enclosure
» Spray down tested to achieve IP-65 rating
» Flexible & rugged mounting options

2 **Versatile connection options:**
» LTE
» WiFi
» Ethernet

3 **Streamlined data acquisition:**
» Deploy large-scale wireless networks with a minimal infrastructure footprint

Keep your facilities organized and efficient!

Easy to use & configure: work smarter, not harder

Obtain real-time monitoring and insights 24/7

FREEDOM FOR DEVELOPERS

Customizable, always-on condition monitoring for complex machine processes. Reduce downtime, improve efficiency, and extend asset life.

At Everactive, we've opened our batteryless platform to other developers to construct their own hyperscale, self-powered IoT applications in order to maximize end user benefits—helping them boost efficiency, improve safety, and shrink their environmental footprint.

Our wireless, battery-free, 24/7 sensor platform and the Evergateway linking them can streamline a manufacturer's operations and save them labor hours without the burden of constant battery and network maintenance.
